Scheduling Your Ride Home

- 1. Order the car while you are still upstairs in your hospital room.**
 - Wait upstairs until the driver arrives so that you do not spend any time in the lobby.
- 2. Do not order your car until AFTER mom and baby have been discharged.**
 - Wait until the hospital officially tells you that you can leave before ordering a car.
- 3. Bringing your own car seat? Put your baby in the car seat upstairs.**
 - Buckle the straps. The straps should be tight enough that you cannot pinch the harness straps together.
- 4. If you're going to be discharged after 6pm or during a national holiday:**
 - Call us beforehand at 212-862-7233 so that we can help determine availability.

FAQ

What kind of car seats do you use?

Kid Car uses convertible car seats for children between 5-45lbs in the rear facing position and up to 120lbs in the forward facing position. The car seat is probably bigger than the one you (should) have waiting for you at home, but it is crash tested for children as little as 5lbs.

I live in New York. Why do I need to buy a car seat?

Because one of these days you're not going to be riding in one of our vehicles and kids need to be in car seats until they are eight years old, both for safety and to comply with NY State law.

Can I bring my own car seat?

GREAT IDEA! The driver will install your carrier using the lap belt, which provides an equal level of protection as the base that came with your seat (so leave your base at home). If the driver is not confident in the installation, we will ask that you use our car seat instead (to ensure your baby's safety).
